HTML and CSS Cheat Sheet

Free original study material from B. Bright Learning Space. You may print and share it for learning.

HTML structure

Every page has <html>, <head> and <body>. Headings use <h1> to <h6>, paragraphs use <p>, links use <a href>.

Semantic tags

Use <header>, <nav>, <main>, <section>, <article> and <footer> so browsers and screen readers understand your page.

CSS basics

A rule has a selector and declarations: p { color: navy; font-size: 18px; }

The box model

Every element is a box: content, padding, border, margin.

Flexbox

display: flex; justify-content: center; align-items: center; gap: 1rem;

Practice

Build a page with a heading, an image, a list of three hobbies and a link to your favourite website.
